BLAIRMORE, ALBERTA, THURSDAY, SEPTEMBER 14, 1922.

\$2.00 YEARLY

FINAL FOR CRAHAN CUP

The final game for the Crahan Football Cup is to be played at Hillcrest on Saturday, the 23rd. The competing teams are Michel and Blairmore. This game is looked forward to with no small amount of interest and will be witnessed by the largest turnout of spectators in the history of football in this district.

For further particulars see hills.

NEW DISCOVERIES OF GAS

BOARD OF TRADE HOLDS LUNCHEON

REGULAR MEETING OF TOWN COUNCIL

AGRICULTURAL SCHOOLS

SUNDAY SERVICES AT UNION CHURCH

A three-million-feet flow of gas has been struck at Barnwell, near Taber, by the Calgary Gas Company. A flow of gas was also struck during the past week at Vauxhall, on the farm of the Otis-Staples Company near Medicine Hat.

Get your holiday films developed and printed by D. A. Howe, Phone 83.

The first luncheon under the auspices of the new Blairmore Board of Trade was held on Thursday last at the Cosmopolitan hotel.

Owing to the short notice given, the attendance was not large, but nevertheless, a very interesting and profitable conversation ensued. Matters affecting the town and districts at large were discussed, particularly the question of facilities for railway passengers.

It was decided to send a delegate to Lethbridge to attend the sitting of the Board of Railway Commissioners on September 27th and to oppose the proposed taking off of the local Cardston to Crown Nest trains. Mr. J. E. Gillis was unanimously chosen delegate.

A delegation, composed of the secretary, W. Bird, and W. J. Bartlett reported having taken the matter up before a special meeting of the Coleman town council and were assured support from that body. In all probability Coleman will send a delegate to Lethbridge also.

We understand that the Board of Trade will hold their monthly luncheons in future on the third Thursday of each month, alternately at the Cosmopolitan and Greenhill hotels, or at other places where accommodation is adequate.

A fine of one thousand dollars was imposed on the Dominion Export Liquor Co. at Creston on Saturday last, for selling liquor contrary to the export trade regulations.

The forty-seven men entombed in a mine at Jackson, California, since August 27, are not yet reached and hopes of recovery alive are practically given up.

The regular fortnightly meeting of the town council was held on Monday night, Deputy Mayor Morgan and Councillors J. A. McDonald, J. Angus McDonald, A. Morency and W. McVey being present.

The minutes of previous meeting were read and approved and the following accounts were passed for payment, subject to approval by committee:

P. Smallwood \$20.00, G. Lang

\$3.00, P. Baratelli \$14.65, E. Hinds

\$3.50, West Canadian Collieries for

August electric current \$241.75,

Blairmore Enterprise \$5.60, S. Ennis

\$16.00, A. Lenchucha \$11.50, J. Kubic

\$4.00, W. Patterson \$4.00, J. Jacobson

\$8.00, Workmen's Compensation

Board \$4.24, Debenture Redemption

\$173.44, L. H. Putnam \$62.50, J. E.

Gillis \$249.99, Petty Cash \$25.00, Angus Chala \$4.00.

Communication was received from

Mayor McLeod, stating that he was

slightly improving at Vancouver and

hoped soon to return.

Communication from the Board of Railway Commissioners, announcing setting of board at Lethbridge on the 27th, was read and filed. Council agreed to co-operate with Board of Trade in sending representative to attend setting.

Applications for building permits were received from T. Appleby, A. Decoux and C. Romeo. They were referred to the Works and Property Committee for action.

Account of Fred Irwin for painting the new town warehouse was passed for payment.

Question of cattle roaming at large, contrary to Pound By Law, received some consideration.

The following amendment to By Law No. 9 was given three readings and duly passed:

"That no owner or other person having the care, custody or control of any dog, of either sex, shall suffer or permit same to become a nuisance by continual barking or fit any other way that would likely disturb the public peace within the limits of the town."

"Also that no owner or other person having the care, custody or control of any bitch shall suffer or permit same, while in season, to be at large within the limits of the town."

The Council intends to enforce the above and the public are hereby requested to act accordingly.

The Council was informed that one of the councillors, E. Picariello, had not yet made settlement of either 1921 or 1922 taxes.

Council adjourned at 10.30.

COLEMAN WILL HAVE CLOSED-IN ARENA

We understand that Coleman hockey fans have definitely decided to have a closed-in arena and this week application has been made to Edmonton for incorporation and a charter. The necessary funds are in sight and there is reason to expect real life at Coleman the coming winter.

TIME FOR REDEMPTION EXTENDED

Extension of the time for redeeming lands sold in the 1921 tax sale has been made by the provincial department of financial affairs, by order of council, October 31, 1923. This extension of time for redemption applies to all parcels of land other than those situated in cities, and other than "unsubdivided land" within the meaning of the tax sale relief act, which were sold for taxes in 1921.

The financial district meeting of the Methodist church will be held at Macleod tomorrow.

John D. Matheson, solicitor, was up from Macleod the early part of the week.

Arrangements have been made by the department of agriculture, to transport students from the Youngmen's and Girls' Institutes districts free of charge to the schools of agriculture at Olds, Claresholm or Raymond. The four schools to be in operation this year are at Olds, Claresholm, Raymond and Vermillion. The classes will commence October 31. Dormitory accommodation will be provided for girls at Olds, Claresholm and Raymond schools.

PROMINENT PEOPLE

VISIT ALBERTA

Parties of prominent people visiting Alberta during September include the members of the Montreal Board of Trade, members of the British Empire Exposition Commission, who were in Calgary on September 8th, and will be in Edmonton later; also passenger agents of railways in Canada and the U.S. who are meeting in Calgary and Banff in convention, numbering between 300 and 400.

MCMURRAY TAR SANDS

Practical application of a process for extracting oil from the tar sand deposits at Fort McMurray, has now been made with a plant installed by a company operating in that vicinity. The tar bed being operated is 150 feet thick.

The services at the Union Church on Sunday next will be somewhat of a special nature.

In the forenoon a special young people's service will take the place of Sunday School classes at 11, to be addressed by Rev. Thomas Powell, M.A., superintendent of Methodist missions. Parents and friends, as well as the young people, are invited to attend this service.

The Sunday School in the afternoon will be addressed by Mr. Powell.

Rev. Mr. Powell will be the speaker at the evening service, when a large audience is expected. Special music will be rendered by the newly reorganized choir.

"RADIO REX"

A real Radio Rex has been discovered in a Studebaker car owned and operated by Mr. Beley. That car has a horn which automatically sounds when approaching another vehicle, a team, a brige, a person or any other object that might prove an obstruction. It's alright, but it really has no place on the duck hunting grounds, for just as soon as the car heaves in sight of the duck, quickly reposing on the lake, the horn blows and the birds are gone before a gun can be got in readiness.

(Continued)

Bar B Ranch,

August 14th, 1923.

I am so angry with Mr. Livingston's that I could revert to the days of my unregenerate childhood and kick and scream. Not for years have I been so angry. I am so angry with him, so bitter, so unreasoning. I flatter myself that I can stand toeing with the next one—but Don Livingston is the last example of a man I ever met! He seems to consider it his mission in life to plague me with the limits of my endurance, and when I have given up, he adds insult to injury by laughing at me. I suppose he is merely trying to pay me back for the blunder I made at Elsie. And that reminds me that Mary and I don't know who he was at the time; we had never met Mr. Bingham's partner, and not being particularly interested in him did not consider him of the Tom Livingston class of men. Mrs. Bingham went to Winnipeg last month. Then, when it came to her that I might come here, she could not understand why I should keep a secret from me, in the hope that it might be productive of amusement for her and embarrassment for me.

When I try to put the cause of my anger into words it is a very small thing indeed. And I am ashamed that I allowed my annoyance to be seen. I do not know what Mrs. Bingham will say when she comes home.

Last night, Saturday, Mr. Paget called. He is rather an extraordinary being. I must admit; still even if he is painfully lacking in a sense of humor, he is a good fellow. He plays beautifully and sings not too badly; and with Mr. and Mrs. Bingham as an appreciative audience, we had a most delightful evening, ending a truly enjoyable time untroubling "Oh that we were maying," when the serpent appeared.

Not that Mr. Livingston, with all his pretensions, is not full of the sort of high-falutin' my scriptural metaphors. He came in through the kitchen, dressed—spurs and all—just as he had left us. He was wearing a tall hat, the saddle, a big mass of hair in one hand, and a wedge of Leo's de-

About Moths That Look Like Hawks Gathering Humming Birds.

"THAT was a great laugh we had today about Hawk," stated Plimie, "and I think you'll like it as we are thinking—or rather, laughing about a bird there's another. Look! It's a Humming Bird!" And the little fellow pointed toward some white blossoming flowers that blossomed nearby. The Brewaries jumped up and ran toward the flowers, however.

"Helen, Humming Bird!" they cried, crowding close to the little creature that was fluttering above the blossoms. But there was no answer.

"Humming Bird? Hello?" they tried again. This time there was an answer.

"I'm not a Humming Bird. I'm a Hawk Moth. A Humming-Bird Hawk Moth."

"And it flew away to some other flower, where it was suddenly joined by another Moth."

The Brewaries followed and stood staring at the two dainty little visitors to their faraway home. At last Plimie ventured to invite them to come and talk, which the two Moths seemed to accept.

"Why did you come to the End-of-the-Earth?" Snookums asked the one nearest him.

"Because we had heard that it is the most wonderful place in the world," it replied; "so we naturally thought we'd find the loveliest flowers and the most delicious honey here. And we have!" With these words it rolled up its long tongue as though to taste whatever sweetness was left in its mouth.

"You certainly fooled us!" exclaimed Khakoo. "We were sure you were Humming Birds for your wings fluttered so as you hovered over our honey getting that you looked exactly like them. At least," he added quickly, "you're not a Hawk Moth. You're a Hawk, and that's what makes a hawk around you, so that it really is impossible to see you distinctly then."

"And when you open your long tube-tongue," said Plimie, "and stick it down your throat, it looks just like a Humming Bird's beak!"

"And then," cried Snookums, who was very puzzled, "you have a full of long scales on each side of your body, and you look just like the world like the Humming Bird's Hawk Moth. You certainly did fool us!"

"The two Moths seemed to accept," said Plimie, "and they rolled out their long tongues."

"But Moths only fly at night!"

"Most of them do," one answered, "but there are exceptions, we are exceptional. You see," it explained, "we eat honey, and as every one knows, it is easier to get honey than to gather flowers in the sunshine. Our babies eat at night, though, as well as by day."

"What do they look like?" asked Plimie curiously. "Tell us about them."

"Mrs. Moth," he said, "she is Mrs. Moth. She is not Caterpillar, that grow to about two inches long before they split their cocoons and later change into Moths just like us. She is a caterpillar with dots and line of the end of their bodies by which they can crawl."

"What do your Caterpillar babies eat?" asked Lethbridge.

"Oh, straw or stems near the ground," Mrs. Moth said carelessly. "But I'm hungry for more honey." We must be!" With that they both flew away.

"Well, I never!" Plimie cried in amazement. "Let's go and tell Stella."

And four very bewildered Brewaries started running toward Stella's fair

Nervous Breakdown

The extreme depression and discouragement which comes over us at times is the most alarming symptom of nervous exhaustion.

This letter is a message of hope to all who find themselves in this unfortunate condition.

Mr. Con. T. Tingley, Alberta N.B., writes:

"Forgetting I was in a very nervous condition, I took a few weeks off and got rid of a great deal of stress. The best course would have been to go to a doctor, but when I did not do this, I became very nervous, very thoroughly restored and I was entirely relieved of those terrible feelings I used to have. I shall now be ready to apply to the friends of Dr. Clark's Nerve Food and I can only testify today to the great benefits received.

There was a marked change before I had finished the course but when I did not do this, I became very nervous again, very thoroughly restored and I was entirely relieved of those terrible feelings I used to have. I shall now be ready to apply to the friends of Dr. Clark's Nerve Food and I can only testify today to the great benefits received.

A friend advised the use of Dr. Clark's Nerve Food and I can only testify today to the great benefits received.

"There was a marked change before I had finished the course but when I did not do this, I became very nervous again, very thoroughly restored and I was entirely relieved of those terrible feelings I used to have. WORLD HAPPENINGS BRIEFLY TOLD

Gen. Sir Pertab Singh, regent of Jodhpur State, British India, died suddenly Sept. 4 of heart disease.

A severe earthquake wrecked Takaboku, Northern Formosa, Sept. 2, according to advices received at Tokio.

The late Prince of Monaco left to the French Academy of Agriculture, his model farm at Sainte Suzanne, in the Alpes Department in France.

A Moscow message states that it is the intention of the Soviet Government to sell the crowns of the Tsars, which have been kept in the Kremlin.

The German Government has sent a note to the League of Nations, entering a fresh protest against the presence of French troops in the Saar district.

Nearly four thousand farm hands were placed on Alberta farms during August, according to the monthly report issued by the Alberta Provincial Labor Bureau.

A syndicate which is promoting a steamship service between France and Ireland has bought a vessel in Amsterdam with accommodation for 350 passengers, in addition to cargo.

Louvain University Library is gradually being built up again. It already contains 261,000 books. In 1914, before the Germans set fire to the town, it contained 500,000.

A plot to kill the Rumanian Royal Family while attending the races during a festival has been uncovered and a number of former Hungarian army officers were arrested.

The Chinese Government has informed the Chamber of Commerce that the ordinance prohibiting enemy aliens in Hong-kong, which expired on Aug. 29, will not be renewed.

Rumors circulated in Berlin of the death of four Crown Prince Frederick William of Germany, who is staying at Dourn, Holland, with his father, were denied by the latter's personal physician.

A series of motors-ambulances is being built between Boedapest and Altopia. The journey, by way of Mount, takes five days, and the desert sheikhs have accepted a lump sum to restrain their tribes from raiding the omnibuses in transit.

George Robert Sims, journalist and dramatic author, died at his home in London on Sept. 5. He observed his 75th birthday on Sept. 2. He had conducted a column in the Reference under the pen name of Dagone, since the founding of the paper in 1877.

A shortage of thirty million tons of coal has been caused in the normal supply of the United States by the tie-up in that industry, according to estimates made by the central bureau of the chamber of commerce in the United States.

Six hundred miners employed by the Madison Coal Corporation at Hermin Hill, went on strike following refusal of company officials to allow some of the men who ride to work in automobiles to park their cars inside of a fence which encloses the mine.

Prince Not Wealthy Financial Demands Absorb Greater Part of Yearly Income

Although probably nobody will maintain that the Prince of Wales should be classed as a poor man, yet he is by no means so sufficiently situated as many may imagine. It is true that his apparent income runs into about \$200,000 a year, but the financial demands upon him are so heavy that this sum is very considerably shrunk before he can readily set any part of it aside. Indeed, fully half of his estimated income, that is, about \$100,000, goes to pay off pocket as a result of his somewhat extensive trip.—Christian Science Monitor.

Do Large Breaths Hurt? Is Your Chest Wheezy?

Proper treatment is a vigorous rubbing of the chest, neck and nose along with good old Nerviline. This wonderful liniment sinks into the tissues where the pain is seated and gives instant relief. It cures chest wheeziness, all sense of soreness goes quickly. Try Nerviline for chest tightness, coughs, colds, and soreness. It's a family from numerous families like ours. It's in every home. Large bottles, 35c at all dealers.

Why the Rush?

A remarkable increase in the volume of motor traffic in Canada is shown by returns compiled by the Department of Customs. According to their regulations, 617,235 automobiles entered Canada to tour during 1921, as compared with 93,399 for the previous year.

RUN DOWN PEOPLE WEAK AND NERVOUS

Thousands in This Condition Can Easily Be Helped

There are thousands of people who bear the pain and discomfort of minor illness that the homoeopath is only temporary and will be outgrown in time. Often these illnesses are not serious enough to require the attention of a doctor, but will respond to intelligent home treatment. A reliable remedy for these cases is a product known as "Pink Pills," with a multitude of householders, girls or students studying hard in school, easily fall a prey to this condition. These pills need not be taken if prompt measures are taken to check it in its earliest stage. Dr. Williams Pink Pills will restore the general health and bring back the strength. Its progress has been greatly advanced of late years by the action of important organizations in sending delegations to many sections of the country, so that their members may add to their first-hand knowledge of their homeland. Such an organization is the Montreal Board of Trade which will celebrate the one hundredth anniversary of its founding by beginning on September 1, a thirty

Montreal Board Of Trade Perpetuates Maisonneuve

There is a striking monument in Montreal to Maisonneuve, founder of Canada's Metropolis. As in his life, his thoughts were of the West, so does the memorial to stand today. The sculptor has caught the spirit of the adventurous pioneer in the pose of the body and the head, Vision, courage, determination are plain to the observant eye and understanding mind.

Maisonneuve and the host of gallant men and noble women who laid the foundation of the Canada of today, long ago embarked upon the greatest and last quest. But their faith in the new land is as a living flame in the hearts of their successors. They see their country favored by geography and nature, a link between East and West, and extending almost 4,000 miles from ocean to ocean. They know that it is endowed with a richness of natural resources beyond the power to calculate. Above all they rejoice in its attainment to place and a voice in the councils of the nations.

Retirement is often pleasant. The true Canadian has little time for that. His heart and mind are on the present and the future. He knows that his country is to come to full fruition as a nation it must be by still further efforts on the part of its people individually and collectively. No single province within the Dominion's far-flung boundaries can afford to disregard another. Each must be in sympathy with all the rest. The East share in the problems as well as in the joys and prosperity of the West. The West must have faith in the East. The West must be able to withstand the pull of favorable but unbreakable chain of affection and goodwill there, and will put and keep Canada in the very vanguard of the world's great nations.

The development of the national spirit has been fostered in many an hour of peril, difficulty and struggle. It is beginning to bloom in beauty and strength. Its progress has been greatly advanced of late years by the action of important organizations in sending delegations to many sections of the country, so that their members may add to their first-hand knowledge of their homeland. Such an organization is the Montreal Board of Trade which will celebrate the one hundredth anniversary of its founding by beginning on September 1, a thirty

days' tour of the Dominion. The members will not only see the country in all the glory of its most beautiful surroundings, but the experience will be so arduous as to give them a new perspective of its wealth of soil, forests, mines and waters, and impressions of its industrial and commercial growth that would be impossible of visualizing in any other way.

From Montreal the party will travel westward via Toronto and the Great Lakes, thence from Port Arthur to Winnipeg, the greatest primary grain centre on the continent, across the vast prairie lands and through the Rockies to Vancouver and Victoria.

On the return journey they will make the 550-mile cruise up the north Pacific Coast from Vancouver to Prince Rupert, one of the principal Canadian National Railways steamers. That part of the journey will give the party a splendid idea of the development in the mining, lumbering and pulp and paper industries of British Columbia, with all their future possibilities.

At Prince Rupert, the party will turn down the solid gold coast of Ketchikan Island, there will be every opportunity to gain an insight into the enormity of the halibut and salmon industry of the province. From Prince Rupert eastward the party will be come acquainted with the Skeena River, with its historic and romantic qualities, its arrearing grandeur, and its fame as one of the most prolific salmon streams in the world. They will see too, some of the Bulkley and Nechako River Valley country, one of the newest fields of settlement opened up in the west. Unknown to the vast majority of Canadians the luxurious valleys that lie between the mountain ranges in this area, are suitable for mixed farming, dairying, fruit growing

and cattle raising. In the years to come their productivity, now a matter of knowledge to comparatively few, will offer means of livelihood and opportunity to thousands of new people.

Shortly after leaving Prince George, the party will pass through Mount Robson Park. This is a veritable wonderland of mountain scenery, some 650 square miles in extent and set aside by the Government of British Columbia as a national playground and wild life sanctuary. Here will be obtained an excellent view of Mount Robson, with an altitude of 13,063 feet. It towers above the surrounding peaks, sublime, majestic, with green glistening glaciers and pure white snow adding to its beauty. Sometimes its own summit is lost amidst the mists and clouds; quite often that summit is the centre of the moving storms. But on Mount Robson they beat in vain.

Next Jasper Park, another mountain kingdom, but of greater extent, embracing 4,400 square miles of sublime mountainous scenery, a section of the Rocky Mts. It is a playground for sportsmen. At Jasper the party will spend two days at Jasper Lodge, the new Alpine chalet built on the shore of Lake Beauvert by Canadian National Railways, and the first of a series to be built throughout these Northern Canadian Rockies. At night, they leave for Edmonton.

From Edmonton the homeward route will be through the rich farm lands of the northern part of the prairie provinces to Wmipeg following the trans-continental line of Canadian National Railways through the rich pulp forests and new farm lands of Northern Ontario to Cochrane, down through the famous Cobalt Mining districts over the Temiskaming & Northern Ontario Railway to North Bay, thence to Ottawa and back to Montreal.

Indigestion And Dyspepsia Overcome

Victims of stomach trouble, indigestion, dyspepsia and their allied complaints are relieved as effectively as relief of relief and comfort. Thousands of people have regained the joys of health by its use after everything else they have tried had failed. Stanley Gibbons, 237 Chambers St., Wilmette, Ill., says:

"For the first time since I had the flu I'm feeling like my old self. For nearly three years I suffered so much with my stomach I dreaded to eat anything. I am never bothered with stomach trouble since taking Tanas and it feels good to my finger tips."

Tanas helps the stomach digest the food properly and eliminate waste. Soon the whole system is built up, the blood is purified and the entire body takes on new tone, vitality and energy. Get a bottle today and start on the road to health. For sale at all good druggists.

Handel's Appetite

Said to be Able to Eat a Meal That Would Fatten Five Ordinary Appetites

Many great musical composers had exceptionally large appetites. When Handel dined alone at a restaurant he generally took the precaution of ordering a meal for three. Once, on asking, "Isa de dinner ready?" at a tavern where he was little known, he was told, "as soon as the company comes." And he astonished the waiter by seating himself with the remark, "Don't bring up the thener—I'm done eating."

Handel always voracious, delighted in dining alone, and was known to consume a meal that would have satisfied five ordinary appetites.

CATARHAL DEAFNESS

is greatly relieved by constitutional treatment. HALL'S CATARHAL MEDICINE is the specific for Catarhal Deafness. Deafness is caused by an inflamed condition of the organ of hearing called the Catarhal Tube. When this tube is inflamed you have a ringing sound or imperfect hearing. When this tube is inflamed Deafness is the result. Unless the Inflammation is removed the ear will never be restored to normal function and deafness will continue.

Deafness free. All Druggists.
F. J. Cheney & Co., Toledo, Ohio.

New York Radio Companies Figures just announced indicate that in New York State alone, during the month of March, 1922, 1,717 new radio corporations were organized.

NEW SUPER-GAS INCREASES MILEAGE

The Red Star Refinery at Montreal has secured the Canadian rights for the manufacture of a new product of oil to super-gasoline, says the Financial Post. It is prepared from crude by a special process which is said to be considerably cheaper than the Burton process now generally used in the preparation of gasoline. Tests have shown this product, which is known as super-gas, to give greater efficiency and increased mileage of twenty-per cent.

The process was devised by Dr. A. S. Ramage and bears his name. It consists of the passing over iron ore in a closed tube, vaporized oil mixed with steam. A yield of motor spirit, (with the use of gas oil), has developed from 70 per cent to 85 per cent from the crude. The remaining percentage is now under a course of treatment. It is in a vapor state and it is hoped that useful products will be derived from the residue.

The cost of operation is small, as the gas taken off is used for fuel to operate the furnace used in the process and the iron ore while originally of little cost, in no way deteriorates.

The resultant product is of the gasoline quality, and it contains no trace of carbon forming compounds.

It can be used with any carburetor and in actual tests of operation of ordinary automobiles, shows conclusively an increase of 25 per cent mileage with a similar increase of power. A remarkable feature claimed for super-gas is that what is commonly referred to as a "knock" in automobile engines is almost entirely eliminated.

The reason of its economy is given through the tube in which the steam is mixed. This combination of steam and vaporized oil, in contact with the tube, with which the tubes are filled, at proper temperatures, causes a chemical reconstruction so that the resultant product coming out of the tubes contains a large percentage of super-gas.

The actual cost of the product is small. While it is claimed that the percentage of recovery of super-gas with the use of this process, from fuel oil, is from 65 per cent to 85 per cent, to be conservative the company has taken 60 per cent as a basis in arriving at costs. With a basic cost of fuel oil at three cents a gallon, a recovery in 60 per cent super-gas would make the raw material cost of five cents, to which should be added the cost of conversion, finishing and royalties, estimated liberally but not exceeding 1/4 cents per gallon making a total cost for super-gas of 7½ cents per gallon.

While it is claimed that super-gas will command a much higher price than gasoline, even on the basis of the present price of gasoline, which is 14¢ cents at the refinery, super-gas will yield a net profit over gasoline of \$3.50 per barrel.

The Barnsall Corporation in Kansas City have had large units installed for the production of super-gas and has in actual operation a 500-barrel a day plant.

THIS PLACE SHOULD BE FILLED

I want a man to work on my farm. I don't give dancing lessons. I have no piano. I can't sew steak three times a day. I do give three square meals, a real bed, fair wages. If any man who knows a cow from a talking machine, can hear an alarm clock, gets up at 5 o'clock, wants the job, I will agree not to treat him like one of my family, but a darn sight better. Apply at the Steve Wiggins place, Interval Road.—Exchange.

NEW NATIONAL PARKS FOR WILD LIFE PRESERVATION

Three new areas for the preservation of rare species of wild life have recently been proclaimed National Parks. These are Neniskan and Wanaksay parks in Southern Alberta and Monksawak park in Saskatchewan. These reserves, which total an area of 535 square miles, have been set aside for the protection of the Pronghorned antelope, one of the most interesting of all Canadian native species, the only member of a special family of the ungulate, or hooved animals, now found nowhere else in the world except in Alberta and Saskatchewan and some portions of the United States.

The rapid reduction in numbers of the antelope has been a matter of grave concern to those interested in the conservation of wild life for some years.

Unless a success can be made of protection by means of sanctuaries their extinction is a question of only a few years.

It is some time since antelope disappeared from Manitoba and the Chief Game Guardian of Saskatchewan estimates that there are now only 250 left in that province while the Chief Game Guardian of Alberta places the number at 1,000 in Alberta.

For several years the Canadian National Parks Branch attempted to breed antelope by placing them in the Buffalo parks on the prairies but owing to the shock of capture no success was attained. After repeated failures

it was decided to try the experiment of enclosing a herd in some area in which they were found to be already established.

The Neniskan Park, which was the outcome of the first experiment, represents the most successful attempt yet made on this continent to breed antelope into captivity.

In the late winter of 1915 it was reported that a band of antelope were in danger of starvation near Foremost, Southern Alberta, on account of the heavy snowfall. Officials of the Parks Branch were despatched to the locality and by feeding the starving animals on alfalfa a fence was erected around the area and a herd of about 50 secured.

These have increased to about 145 and no sign of disease has yet appeared.

The two other parks recently created as yet contain no antelope but it is expected they will be stocked in the near future.

The name Neniskan is Cree Indian for "Antelope," while Monksawok means "common or national property," the nearest Indian expression to national park.

ALBERTA EXHIBIT

The Alberta government exhibit for fairs in the western states was shipped from Edmonton this week for Billings, Montana, where the Midland Empire Fair is held. The exhibit will also be shown at the Colorado State Fair at Pueblo, Colorado. The intention during this trip is to concentrate on the irrigation lands of the Lethbridge Northern Irrigation District.

The exhibit is accompanied by C. G. Groff, publicity commissioner, A. W. Foley and Frank Peterson, of the department of agriculture. Representatives of the irrigation council will also be with the exhibit, Mr. Charlesworth, chairman of the irrigation council, accompanying the exhibit to the Colorado fair.

The exhibit is one of the best sent out by the province. It was prepared under the supervision of the publicity department by Frank Peterson, who has been engaged in this work for the provincial government for some years and is considered one of the best experts in Canada in exhibit work.

HAMMOND, Ind.—You tell me I can not have wife, I tell you to go to hell," Tony Renole told the judge.

"One hundred dollars," said the judge.

"I tell you to go to hell two times."

"Two hundred dollars."

"And I tell you to go to hell three times."

"Three hundred dollars."

"What do I care? I not got \$300," and Tony wept.

PRIZES AWARDED AT THE BELLEVUE 1922 EXHIBITION

Following is a full list of prizes awarded in the 1922 Exhibition at Bellevue on Labor Day, September the 4th, under the auspices of Bellevue and District Horticultural and Industrial Club:

Class 1.
Best Cultivated Garden. Dr. Beeman's Special Prize awarded to E. Cole. Second to J. Alsopp.

Class 2.
Best Collection of Vegetables. First prize and Dr. Beeman Special awarded to J. Alsopp. Second prize to Mr. Bent, of Lunbuck.

Class 3.
Round White Potatoes. First prize W. Cole, second Gilbert Cousins, third W. Cole.

Class 4.
Six Round Colored Potatoes. First S. Rowe, second S. Rowe, third W. Chappell.

Class 5.
Six Kidney White Potatoes. First W. Cole, second J. Currie, third S. Rowe.

Class 6.
Six Kidney Colored Potatoes. First J. Currie, second Gilbert Cousins, third Gilbert Cousins.

Class 7.
Best Collection of Potatoes. First W. Cole, second Gilbert Cousins, third Gilbert Cousins.

Class 8.
Cauliflower, 2 heads. First S. Rowe, second J. Alsopp, third Gilbert Cousins.

Class 9.
Conical Cabbage, 2 heads. First Dave Morris, second S. Rowe, third Gilbert Cousins.

Class 10.
Flat Cabbage, 2 heads. First A. Goodwin, second J. Alsopp, third J. Alsopp.

Class 11.
Curly Kale, 2 heads. First D. Roberts, second D. Roberts, third A. Hallworth.

Class 12.
Brussel Sprouts, 2 heads. First J. Alsopp.

Class 13.
Kohi Rabi, 3 heads. First D. Morris, second D. Roberts, third D. Morris.

Class 14.
Red Cabbage, 2 heads. First E. Christie, second J. Alsopp, third A. Hallworth.

Class 15.
Broad Beans, 12 pods. First S. Rowe, second A. Watson, third J. Fisher.

Class 16.
Wax Beans. 7 entries. First S. Rowe, second A. Watson, third J. Fisher.

Class 17.

Snow Turnips. First, second and third, Gilbert Cousins.

Class 18.
White Turnips. First D. Roberts, second G. Cousins.

Class 19.
Yellow Turnips. First D. Roberts, second J. Currie.

Class 20.
Long Carrots. First J. Fisher, second and third S. Thomas.

Class 21.
Intermediate or Short Carrots. First F. Padgett, second J. Currie, third Mr. Bent, of Lunbuck.

Class 22.
Leeks. First, second and third prizes awarded to Mr. Alsopp.

Class 23.
Onions from nests, any color. Firm and second J. Currie, third J. Roberts.

Class 24.
Frame Cucumbers. 7 entries. First E. Christie, second D. Roberts, third D. Morris.

Class 25.
Ridge Cucumbers. 4 entries. First prize to Mr. Carr.

Class 26.
Rhubarb. 8 entries. First and second A. Goodwin, third J. Cousins.

Class 27.
Swiss Chard. 7 entries. First, second and third D. Morris.

Class 28.
Cluster of Shallots. First prize E. Blas.

Class 29.
Cluster of Multipliers. Second prize only to A. Goodwin.

Class 30.

Pickling Onions. First, second and third prizes to Fred Henson.

Class 31.

Round Beets. First A. Goodwin, second S. Thomas, third D. Roberts.

Class 32.

Beets, Intermediate. First D. Morris, second J. Currie.

Class 33.

Long Radish. First prize E. Blas.

Class 34.

Winter Radish. Two entries. See one prize to J. Redfern.

Class 35.

White Celery, 2 heads. 12 entries. First and second to D. Roberts, third S. Resio and J. Alsopp.

Class 36.

Red Celery. Second prize A. Hallworth.

Class 37.

Cabbage Lettuce. First, second and third F. Padgett.

Class 38.

Collection of 12 pods of Peas. 7 entries. First J. Currie, second and third D. Roberts.

Class 39.

Broad Beans, 12 pods. First S. Rowe, second A. Watson, third J. Fisher.

Class 40.

Wax Beans. 7 entries. First S. Rowe, second A. Watson, third J. Fisher.

Class 41.

Heads of Wheat. 4 entries. First and second J. Currie, third E. Cole.

Class 133. Dozen Brown Eggs. First E. Cole, second G. Couzens.

Class 134. Best Home-Made White Bread.

First Mrs. J. Radford, second Mrs. Lanson, third Mrs. J. Radford.

Class 135. Best Apple Pie. 8 entries. First Mrs. F. Gilroy, second Mrs. Watson, third Mrs. Nelly.

Class 136. Special Prizes, first and second, donated by Pike & Co., of Crossland Bros., of Vancouver, for Class 91, and second prize for same to value of \$3.00.

Class 137. Special Prize, donated by Frache Bros., florists, Lethbridge, for Class 75, and second prize to the value of \$3.00.

Class 138. Special Prizes, first and second, donated by The Terrill Florist Co., of Lethbridge, for best collection of annual plants, Class 74.

Class 139. Special Prizes, first and second, donated by the Campbell Florist Co., of Calgary, to persons gaining most points at show.

AN ACCOMPLISHED GIRL

This is a very nice canoe, isn't it, Maud?" said the tall dark young man.

"Very nice indeed, Charlie," replied the pretty girl sitting in the stern.

"There's but one objection to it," he said.

"Indeed! And what is that?"

"Oh, well, you see, if you try to kiss a girl in this canoe, there's great danger of upsetting it, and both the fellow and girl will be thrown into the river."

"Oh, indeed," said the girl, reflectively.

She sat silent for a while, then remarked:

"Charlie, I can swim."

CLASSIFIED

This is a very nice canoe, isn't it, Maud?" said the tall dark young man.

"Very nice indeed, Charlie," replied the pretty girl sitting in the stern.

"There's but one objection to it," he said.

"Indeed! And what is that?"

"Oh, well, you see, if you try to kiss a girl in this canoe, there's great danger of upsetting it, and both the fellow and girl will be thrown into the river."

"Oh, indeed," said the girl, reflectively.

She sat silent for a while, then remarked:

"Charlie, I can swim."

It was the Judgment Day, and throngs of people were crowding around the Pearly Gates trying to convince St. Peter that they were entitled to enter Heaven.

To the first applicant St. Peter said:

"What kind of a car do you own?"

"A Packard," was the reply.

"All right," said St. Peter, "you go over there with the Presbyterians."

The next in line testified that he owned a Buick, and was told to stand over with the Congregationalists.

Behind him was the owner of a Dodge, who was ordered to stand with the Baptists.

Finally a meek little individual came along.

"What kind of a car do you own?"

was the question.

"A Ford," was the answer.

"You just think you own a car.

You go over there with the Christian Scientists."

THE PROCRASTINATOR

Mose and Sam were digging a trench over in France. Although not in an especially safe spot, for a time they were unconscious of their danger. Then a shell flew over their heads and exploded just behind. Others followed. At the fifth explosion Mose asked inquiringly:

"Sam, don't you think it's about time weall done got religion?"

"Cluff!" retorted Sam scornfully.

"Mose, yo' suttinly is a thotless boy. Me. I done got religion when I fu' bomb bust." —American Legion Weekly.

To Develop Asbestos Industry

Canada Has 88 Per Cent. of the World's Supply

Canada's predominance in the production of crude asbestos has not yet been sufficiently capitalized from an industrial standpoint. In 1920 about one-per cent. only of the Canadian output was retained for manufacture in this country. Ninety per cent. of the total production was exported in crude form to the United States and part of this was brought back as manufactured goods. Canada's tardiness in developing its asbestos resources is probably due to lack of skill. The comparatively narrow market afforded for these goods in Canada has something to do with the export of asbestos in its crude form for manufacture elsewhere.

The decision of an important American company to erect a plant at Asbestos, Que., indicates that Canada will not always import an overwhelming proportion of its manufactured asbestos products. Another plant has been located at East Broughton.

The possession of 88 per cent. of the asbestos deposits of the world places Canada in a most favorable position with regard to this product.

It is the mystery mineral. It has never been explained how such a substance originally was deposited in the hard serpentine rocks around Thetford, Que. It is composed chiefly of silica, magnesia, alumina and iron oxide. Its proportions vary considerably, and the properties of the different kinds of asbestos are the most easily fused. Asbestos is sometimes found in the crude state as a silicate substance, and apparently as easy to break as cotton, but it is probably the most indestructible substance under the action of fire.

The utilization of asbestos for commercial and industrial purposes was extremely slow in being started. It began to come into its own with the utilization of steam and electrical power. Many new uses have been discovered for asbestos in recent years. Its fire-resistant properties make it an efficient guardian against fire losses. Its application has been extended to flooring and woodwork, plaster and tiles.

The asbestos industry has had a healthy growth in Canada. It was not greatly disturbed by the depression. There has been a steady increasing market for asbestos products in recent years. Canada's possession of an overwhelming proportion of the world's deposits therefore opens up attractive possibilities for the development of manufacturing enterprises the products of which will command many times the price of raw materials. It goes almost without saying that industries founded upon Canada's natural resources are on the soundest foundation and have greatest chances for success.

Business Prospects Brighter

Outlook Appears More Favorable than for Some Time

Business generally in Canada is beginning to feel the effect of the good crop prospects. Lines such as dry goods and groceries said to be moving better, and merchants state that they find a much better spirit prevailing among the retailers throughout the province. Firm price tendencies in several lines of cotton and woolen goods, moreover, have tended to stimulate sales of these lines, while the advances recently noted in tea and sugar have caused a larger buying at the grocery houses. The railway building programme which is not in progress, moreover, together with railroad and highway work, are giving more employment to the workers, which means more money in circulation and a larger buying power on the part of the general public. Altogether, the outlook appears to be considerably more favorable.

Purchase Purchased Stock

Over 3,000 Saskatchewan Farmers Take Advantage of Government Credit Plan

Since the incorporation of the Livestock Purchase and Sale Act by which the province of Saskatchewan sells, purchases and grade livestock to the farmers of the province on credit, over 3,000 farmers have been assisted. Over 1,100 bulls, nearly 10,000 grade heifers and cows, 400 rams and almost 15,000 grade eyes have been supplied to farmers on credit. Farmers in nearly every part of Saskatchewan have profited by this credit system, some in purchasing better stock and others in laying a foundation of a grade herd or flock.

Quite True

Mother—Mary, I should think you would get tired of hearing me talk to you so much!

Mary—Yes, mother, I do.

Passing of Prince Monaco

Dead Prince Was Internationally Famous as Oceanographer

Prince Albert Honore Charles, of the Principality of Monaco, died in Paris recently. He was the ruler of the smallest principality in the world, within the city whose name is that of the famous international gambling town of Monte Carlo. The prince was well-known in the United States as a sportsman and scientist. One of his old friends was the late Colonel W. F. ("Buffalo Bill") Cody, on whose ranch in Wyoming he went hunting years ago.

The prince made three visits to America, the first in 1888 as a sailor in the Spanish navy, when he obtained a three months' leave of absence; the second in 1913, when he passed considerable time in the west, and the third in April, 1921, when he received the Alexander Agassiz gold medal from the National Academy of Science and a similar medal from the National Geographical Society for his researches in oceanography.

He was also an enthusiastic paleontologist but held that the sea held few, if any secrets of the antiquity of man.

One of the prince's chief interests was submarine knowledge. His charting of the drift of both German and Allied mines in the North and English Channels. Although for years a close personal friend of the former Emperor of Germany, the prince, from the beginning supported the cause of the Allies. The Germans seized his Chateau de Marchais near Reims and threatened to burn it unless he paid them a ransom of \$100,000. The ransom was never paid. Just before the armistice, in 1918, the prince placed at the disposal of the American Government his beautiful estate at Monte Carlo where four hundred soldiers were brought through rapid convalescence.

Schools for Birds

Singing-Master Trains Canaries in Many Parts of England

There are bird schools in many parts of England where men make it their business to teach canaries to sing; for contrary to general belief, the untrained canary is not a good singer. The fault with untrained birds is that they attempt to imitate every sound they hear and so frequently spoil their natural song. At school they are taught to reproduce perfectly certain notes produced by a "bird organ"—a contrivance which looks like a barrel organ—and one note must be mastered before another is learned. The preliminary course covers the first four weeks and then the promising pupils are separated from the backward ones, and exceptionally talented birds are given a special tutor who whistles to them or plays tunes on the flute or flageolet. The ideal training gives the bird four distinct notes; the water note, which, as the name implies, is a rippling gurgle like the murmur of a rill; the whistling note, the flute note, and the rolling note, which is a continuous melody, splendidly rising and falling.

Metal and Lighting

People Killed by Lightning Through Wearing Metallic Ornaments

The danger of exposing any metallic substance on the person during a thunderstorm is again shown by the fact that a boy has been killed by lightning which struck his metal-mounted spectacles. They were instituted along exactly the same lines as followed by the white men today and were rigidly enforced. To be the owner of a totem pole was a sign of social position, rank, wealth and power. It took years of work, sometimes by very expensive artists, to carve the figures and crests relating to the traditions of the family of the owner. A rule that the artist must not duplicate any carving already in existence in the region was rigidly enforced, making the first working of a copyright law in North America. Songs composed around the various totem poles were likewise copyrighted.

Canadian Writers to the Fore

Looks for Good Work from Authors in the West

Replying to criticism that Canada had no genius in literature, J. Murray Gibbon, of Montreal, President of the Canadian Authors' Association, declared at a luncheon given in his home by the Winthrop branch that it was only in the last 20 years that Canadian writers had taken a chance on publication through Canadian authors. Mr. Gibbon added that considerable work of credit to its authors now being produced.

Mr. Gibbon believed the West should come forward rapidly in the production of Canadian literature. The pioneer on the land, the blending of the races and the shaping of social forms in a new country all provided material, perhaps not available for the author in any other part of the country.

Margaret Deland Interviewed

MARGARET DELAND
From the portrait by Joseph Cummings Chase

Great Woman Author Talks About the Selfishness of Jealousy

A man can be fairly happy with a stupid woman, but not a jealous one; a great difference in age is also fatal to a happy marriage if accompanied by unselfishness—these are the main points brought out by Margaret Deland in the first interview she has granted in many years.

As for jealousy—Mrs. Deland defines it as "self love, plus the consciousness of your own inferiority to the person of whom you are jealous." It has the same effect on love "that water has on fire," and the worst of it is, "it will bore any man to death." It will even drive a husband into unfaithfulness.

"Love grows up to reason and down to jealousy," Mrs. Deland said. "Everyone who loves is liable to experience jealousy, but it is deplored."

Suppose she pointed out, that somebody you love, obviously loves someone else better than you. Of course, you will always occupy two reasons, either because you are defective in those qualities he finds in the other, or because he has descended to love someone less worthy than yourself, and thus proves faithless to his own ideals. If the former is the case, you should, according to Mrs. Deland, simply get busy and try to gain those qualities you lack.

"It was Eleanor's jealousy which drove Maurice into untruthfulness," their creator said. "Maurice starts out from the house, angry with Eleanor—he finds this pretty soft creature, and still angry with Eleanor, he sweeps into this thing. If she had been a kind, sweet, unselfish woman, she would have bored him, but their love would have turned into a beautiful friendship, and the selfish jealousy."

Indians Copyrighted Totem Poles

Law Was Rigidly Enforced to Protect Quaint Design

Coyright laws were framed long ago by the primitive Indians of British Columbia and Alaska to protect the quaint designs of their totem poles. They were instituted along exactly the same lines as followed by the white men today and were rigidly enforced. To be the owner of a totem pole was a sign of social position, rank, wealth and power. It took years of work, sometimes by very expensive artists, to carve the figures and crests relating to the traditions of the family of the owner. A rule that the artist must not duplicate any carving already in existence in the region was rigidly enforced, making the first working of a copyright law in North America. Songs composed around the various totem poles were likewise copyrighted.

Outlook for Hog Raising

Farmers of Western Provinces Should Breed Proper Bacon Type

During the years of the great European war the constant demand was for production, and quantity naturally got rather the better of quality in many of our products. Today the demand is more than ever for quality, to produce which there must be certain reversal of the emergency conditions that prevailed from 1914 to 1918, in competition from other countries is to be expected.

The situation is particularly true of the bacon export trade. In this connection the pertinent question is why does Danish bacon lead down in the English market fetch from fifteen to twenty shillings more per long hundredweight of 113 lbs., and Irish bacon from twenty to thirty shillings more than Canadian? It is to the solution of this problem that the Livestock Branch of the Dominion Department of Agriculture has set itself.

It is earnestly hoped that grading and the payment by packers of a premium for selects will prove a big step forward in levelling things upwards and will bring about not only uniformity in the bacon exported, but also a general improvement in the type of hogs bred, which is the first essential.

But not all the grading in the world will result in the improvement desired without the active and watchful co-operation generally of the farmers of the country. Not only must the breeders of all the breeds in the Dominion be willing to grade select bacon at the present time, the balance—from 75 to 80 per cent.—running to other and inferior grades. The percentages of select bacon being marketed by the different provinces are as follows: Ontario 35 to 40 per cent.; Prince Edward Island, 35 to 40 per cent.; Manitoba, 30 to 35 per cent.; Quebec, 20 to 25 per cent.; Saskatchewan, 15 to 20 per cent.; and Alberta, 10 to 15 per cent. Through the work of the Agricultural College, the intelligent industry, of purebred breeders and the promotion of swine clubs it is anticipated that Manitoba will make great strides in the production of good bacon hogs, and that Saskatchewan and Alberta will follow; although the last two provinces have a more difficult task before them because of the present predominance of the thick, smooth, fat-producing type of hog.

Mystery Roads

Vegetation Giving Off Oxygen Adds Speed to Automobiles

The secret of a number of roads, known to motorists as "mystery roads," has been discovered, says Til-Bitz.

Motor cars of all kinds have long been known to gather speed in some unaccountable manner when passing along these "mystery roads." The secret of the added speed is now held to lie in the fact that, owing to the abnormal fertility of the neighboring soil, the vegetation bordering the "mystery roads" is unusually profuse.

Any connection between vegetation and the speed of motor cars may at first sight seem ridiculous—to those who do not know that healthy trees and plants give off oxygen, and that motor engines run more easily when there is plenty of oxygen about. Expert motorists, however, are aware of the effect of oxygen.

Scientists marked down a particular stretch of road in the hamme country—the New Road, Chipping—for inquiry. It slopes and has a rough surface, yet cars going up the gradient from east to west always put on pace. This does not happen if the car is going down.

There was only one possible source from which the extra speed could come—the air.

This turned investigation to the surroundings of the "mystery stretch." It was observed, that it ran through a piece of country prolific in vegetation. Hence an extra dose of oxygen in the air along the road, giving the mysterious lift to passing motors.

Control of the Wheat-Stem Sawfly

How to Proceed Described by a Dominion Entomological Officer

Mr. Norman Criddle, the entomologist in charge of the Dominion Laboratory at Tresherbank, Manitoba, in Pamphlet No. 6 of the Dominion Department of Agriculture of which he is the author, deals with the western wheat-stem sawfly and its control. This insect is a native that has spread from wild grasses with large stems to closely allied cultivated plants such as wheat and rye. It first attacked extensively in the present century, but has made such inroads into the grain fields as to threaten wholesale damage. After describing the habits and methods pursued by the insect, the following control methods are recommended:

(1) Ploughing down to not less than five inches, and then turning upside down, so that there be no overlapping of edges of all infested stubble between August 1 and June 6 of the following year.

(2) The cutting of rye grass between July 5 and 20 in order to kill the larvae infesting it before they reach the ground.

(3) The practice of cutting rye grass may be extended by bromegrass, but this is not always advisable, for bromegrass takes a large part in the rearing of sawfly parasites.

(4) A thin sown strip or two of wheat on infested land intended for summerfallow will induce many sawflies to lay their eggs on these plants instead of flying to the nearby fields. This summerfallow should be ploughed about the middle of July in order to kill the sawfly larvae.

(5) Sow immune crops such as oats, barley, winter rye, clover, flax and any broad-leaved plant.

Stems of grain are cut by the sawfly in late July and begin to fall about the last two days of that month, the time being earlier in dry years than in wet ones. Badly infested fields should be harvested by that date so that the straw can be caught by the binder before they fall. Couch grass is often heavily infested with sawfly larvae and, therefore, should be cut in mid-July or ploughed down. Operation in control is absolutely necessary.

Other notes and observations worthy of attention are given in this pamphlet, which can be had free on application to the Publications Branch, Department of Agriculture, Ottawa.

Trade With Switzerland

In order to promote better trade relations it is reported that the city of Vancouver, British Columbia, has invited Canada to establish a permanent exhibition of Canadian products in the city, offering for the purpose a fully equipped exhibition building. Canadian exports to Switzerland last year were valued at \$8,500,000.

Canadian Sugar for Belgium

Recently Canadian refiners landed about 225 tons of sugar at Antwerp, Belgium, thus invading the home of the sugar-beet, and placing Canadian granulated cane sugar in direct competition with the sugar-beet variety grown in that country. It is a matter of record that it compares quite satisfactorily.

If a man's voice had the same carrying power as a canary's his words could be heard 500 miles.

Over 3,000 Saskatchewan Farmers Take Advantage of Government Credit Plan

Since the incorporation of the Livestock Purchase and Sale Act by which the province of Saskatchewan sells, purchases and grade livestock to the farmers of the province on credit, over 3,000 farmers have been assisted. Over 1,100 bulls, nearly 10,000 grade heifers and cows, 400 rams and almost 15,000 grade eyes have been supplied to farmers on credit. Farmers in nearly every part of Saskatchewan have profited by this credit system, some in purchasing better stock and others in laying a foundation of a grade herd or flock.

Quite True

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargoyle Mobil-Oil.

IT CAN'T BE DONE

We had to smile the other day when we heard a man who ought to know better, contending that he would get along all right if people would let him "do as he pleased." It struck us as being funny, because in this country no one is allowed to. In the first place, it would not be a wise thing either for the man or the rest of us.

Shortly after hearing his remark, we read where a man and his wife had decided to show that they could live without the rest of their fellow-men and without the things produced by others. They decided to go far into the wilds of the Maine woods and live a primitive life, just as Adam and Eve lived. They figured on two things—doing as they pleased, and eating the high cost of living. So to the woods they went, garbed as of nature garbed them, and without

camp equipment or food. They fashioned rude clothing of leaves and to cayus accounts held by the opposition bank in that town, what would the people think? Then would be the same respect then shown for a bank as for a peddler's cart. Supposing a doctor went out in his town to canvas the patients of the opposition doctor, what would the people think? They would think that the medical profession was comprised of quacks lacking in the common amenities of life. Now this principle holds good from the top to the bottom. If your opposition has some business you would like, have patience and wait until it comes to you. Do not try to steal it. Be a gentleman—even if it hurts.

They didn't prove what they had started out to prove, but they did prove that which we are contending—that it is not always best for a man to do as he pleases, and neither is it good judgment to think you can beat the present high cost of living.

It is something surprising the lack of ethics in the business methods of some individuals. Supposing a bank

ever belittled himself enough to go out

and with bows and arrows made with their own hands they killed game and ate it.

And then a game warden, scouring the Maine woods, came upon them.

He took them to the nearest magistrate where they were fined for hunting without a license, for fishing without a license and for killing quail and deer in closed season. Their fines amounted to \$354.

They didn't prove what they had

started out to prove, but they did

prove that which we are contending—that it is not always best for a man to do as he pleases, and neither is it

good judgment to think you can beat

the present high cost of living.

Studebaker
SPECIAL-SIX
TOURING

WHEREVER you look, you will find protection against hard wear built into the Studebaker Special-Six and this quality of construction is just as exacting down under the surface as it is where you can see every detail.

The skillful workmanship and the fine materials of these hidden values are largely responsible for its long-lived dependable service.

Two important elements that make the Special-Six notable for fine performance and comparative freedom from repair, are the four-bearing crankshaft and the seven-inch frame with its five cross-members and sub-frame support.

Rain-proof, one-piece windshield; cow-lights; cow ventilator; massive head lamps; convex light with long extension cord; windshield wipers; eight-day electric clock; glove compartment; leather back; tool compartment in left front floor; outside and inside door handles.

THE THOUSANDTH MAN

One man in a thousand, Solomon says Will stick more close than a brother,

And it's worth while seeking him half your days

If you find him before the other. Nine hundred and nine, min'-depend-

On what the world sees in you, But the Thousandth Man will stand your friend

With the whole round world ag'in you.

You can use your purse with no more talk

Than he uses yours for spending. And laugh and meet your daily walk As though there had been no lend-

ings.

Nine hundred and ninety-nine of 'em call

For silver and gold in their dealing; But the Thousandth Man, he's worth 'em all,

Because you can show him your feelings.

His wrong's your wrong, and his right's your right,

In season or out of season.

Stand up and back it in all men's sight

With that for your only reason!

Nine hundred and ninety-nine can't hide

The shame or mocking laughter.

But the Thousandth Man will stand by your side

To the gallow's foot—and after!

—Rudyard Kipling.

Cowley Happenings

Cutting is about over and threshing well under way.

Miss Doris Elton returned on Friday last to the O. A. C. at Guelph, where she is taking a course in domestic science.

The sixth annual School Fair under the auspices of the Cowley School Fair Association, was held here on Sept. 8th, sixteen districts participating. The displays comprised livestock, flowers and vegetables, needlework, manual arts, cooking and general school work. A large display was made, especially of vegetables, and the judges from the Guelph Agricultural school highly complimented the management.

A competition in public speaking and elocution was held in the evening to a crowded hall.

After the days work, a dance was held, which was highly enjoyable.

ASK YOUR LOCAL DRUGGIST

Sept. 14-yr

Do You Ever Stop
To Think

That if business is falling off, you should step right out of the rut and increase it by the right kind of advertising?

That getting the business is not always a selfish proposition. Modern business entails a certain amount of service that is of as much interest to the buyer as to the seller.

That you will find in stores of your town the obliging clerks, the ones who greet you with a smile; who wait on you courteously, solicitous of your every w^sh, who answer your questions politely; who are willing to take the trouble to supply any information wanted? They help to make better business.

That "mail order" houses succeed because they advertise. You can beat them at their own game by advertising in your local paper.

That many citizens would be pleasantly surprised if they were to investigate the various kinds and classes of merchandise obtainable in their city. With this knowledge, they could spend all their money at home. A DOLLAR SPENT IN YOUR OWN TOWN HELPS YOUR TOWN. A DOLLAR SPENT IN SOME OTHER TOWN HELPS THAT TOWN. AT HOME.

The Enterprise is read every Thursday afternoon by two thousand people in the town of Blairmore alone. That is why merchants who advertise in this paper get good value for their money.

Practice Is Condemned Of Handing Out Dole In Unemployment Cases

Ottawa—Condemning the practice of handing out unemployment doles, declaring that the peak of unemployment is now passed, and that no additional means for dealing with it are necessary, and enunciating the principle "that the problem of unemployment is primarily one of industry, and that every effort should be made in industry to prevent the occurrence of unemployment," the national conference on unemployment came to a close here.

Hon. James Murdoch, Minister of Labor, handed out two resolutions which had been passed unanimously by the conference. He was asked specifically with regard to the attitude of the conference on doles.

"The conference," he said, "expressed the opinion that the practice of handing out doles is wrong in principle and often harmful in effect, and should not be resorted to until all other measures have failed."

The first resolution handed to the press by Mr. Murdoch which he said had received the unanimous endorsement of the conference, is as follows:

"In connection with the attention which had been given by this conference to the subject of unemployment and the measures which may be deemed necessary by the public authorities in Canada to provide for the relief of unemployed persons, the conference hereby states on record, as an expression of its views, that the problem of unemployment is primarily one of industry, and that every effort should be made in industry to prevent the occurrence of unemployment."

"It is recognized that the causes of unemployment in some cases may be outside of particular industries, and in part due to causes which are international. This conference, however, urges upon those engaged in industry the necessity of regulating employment in the interests alike of employer and employee."

The second resolution, moved by Hon. R. E. Finn, and seconded by Hon. C. W. Robinson, also received the unanimous endorsement of the conference. It follows:

"Whereas, in departments of Government, both Federal and local, there are avenues open for employment; and whereas the Canadian National Railways Board is the manager and operator of the Canadian National Railway and the Canadian Government system; and whereas they are boards administering under legislative authority, special department of public works in the various provinces; and, whereas, there are recurring periods of unemployment; therefore, this conference recommends that the respective Governments, the National Railways Boards and other administrative departments of public works in the various provinces, should regulate and carry on their public work and railway operation so as to distribute the work in such a manner as to relieve unemployment to the greatest possible extent throughout Canada."

On the question of unemployment relief, Mr. Murdoch said that the view was expressed by representatives that the peak of unemployment had passed. The hope was further expressed, he said, that there would be no unemployment necessitating Government assistance. If there should be such unemployment, the view of the conference was that no additional means, other than those

World Wheat Crop Smaller

Washington.—The world's wheat production this year will be less than it was last year, but considerably greater than the pre-war average, according to estimates made public by the United States Department of Agriculture. Estimates and condition reports from reporting centres indicate a yield this year of 3,019,29,000 bushels, compared with a pre-war production last year of 3,068,669,000, and the 1909-13 average of 2,890,235,000 bushels. Reports from all sources regarding Russia, said crop conditions were favorable and would feed the nation this year, "eliminating the need of imported wheat."

which had been taken in the past, would be necessary to deal with it.

It was stated that there had been unanimity on all the points mentioned. The unemployment situation was thoroughly canvassed and the difficulties of the various provinces discussed.

France May Utilize German Materials

Plan to be Considered by Special Government Committee

Paris.—An agreement for the restoration of France's war-devastated regions utilizing chiefly German materials came up for consideration before the Special Governmental Committee charged with consideration of delivery of merchandise by Germany.

The plan has been under negotiation at a series of conferences between Hugo Stinnes, German industrial magnate, and Senator Dr. Lüders, President of the Federation of Co-operative Societies of the French Liberated Regions representing 130,000 persons with war loss aggregating more than 13,000,000,000 francs.

Farmers May Shoot Ducks Out of Season

Saskatchewan Government Issues Order for Protection of Crops

Regina, Sask.—An order-in-council has been issued by the Provincial Government making it legal for farmers to shoot out of season, wild ducks which are damaging grain crops.

Many reports have been received from districts where the birds are causing much havoc in the grain fields and at Duval, Sask., they are so plentiful that the efforts of two boys employed for the sole purpose of driving them off proved unavailing.

Amundsen's Air Pilot Returns

Vancouver.—Lieut. E. G. Fullerton, Edmonton, formerly of the Canadian air staff here, who was to have piloted Captain Amundsen's monoplane from Alaska to Spitsbergen, has arrived back from Alaska. Captain Amundsen will make the flight with one pilot only.

Wood Alcohol Poisoning

New York.—The deaths of three men and two women who have been blinded have occurred in the Red Hook section of Brooklyn, which police attribute to wood alcohol poisoning.

NEED AGGRESSIVE IMMIGRATION POLICY

CAPITAL FOR DEVELOPMENT OF WEST IS FORTHCOMING

Ottawa—Immigration and development of our natural resources are essential to the progress of Canada and to the welfare of many national problems, declared Hon. Charles Stewart, Minister of the Interior, in his recent western tour. That a national and aggressive immigration policy has been developed and will shortly be announced, is now definitely known.

"Capital is required for development, especially in Western Canada, where the great natural resources furnish a great field for intelligent investment," Mr. Stewart added. "The Government is prepared to encourage investment for development, but not for exploitation or stock mongering. Every year Canada sends out of the country \$40,000,000 for petroleum and petroleum products. Alberta may, in the near future, furnish a home product that may check in some degree this drain on our capital. The steady development of the United States oil field north has brought producing wells to the international boundary, and it is confidently anticipated that discoveries will be made this side of the line that will bring activity and prosperity to our western territory."

"The Government is prepared to protect and encourage legitimate efforts in development and to discourage stock jobbing brokers. Lease conditions will be carried out to the letter by the Government and investors need not fear retroactive legislation imposing unexpected conditions or exactions. Successful development will repay the Government under present conditions and the prosperity that follows in its wake."

Mr. Stewart stated that there was a feverish activity in the Southern Alberta country by powerful and legitimate companies in development, caused in a great measure by the success immediately across the line. Across the international boundary 40 oil wells are at work, and on the Canadian side drilling is already in full blast. Dr. Dossing, in charge of this branch of the Mines Department, is on the ground watching developments.

Expect Italian Immigrants

Huge Colonization Scheme is Now Under Way

Montreal.—A huge colonization scheme to settle Italian emigrants in Canada is projected by the Government of Italy, which has sent Joseph De Michelis, General Commissioner of Emigration, to make a minute survey of industrial and agricultural conditions in the Dominion, with a view to ascertaining the quota and the type of immigrant most needed here.

Mr. De Michelis arrived through Montreal en route to Ottawa, where he will meet members of the Cabinet and confer with the heads of all departments of labor and immigration.

Following these meetings he will cover each of the provinces from Ontario westward, accompanied by Jules Bolognesi, Italian Consul to Canada. When Mr. De Michelis completes his survey in Canada he will make a similar one of the United States.

In explaining his mission, Mr. De Michelis declared it had three chief reasons: First, to ascertain the class of immigration most needed by the Dominion which Italy could supply; second, to secure Canadian capital, which would be joined to Italian capital with the view of establishing Italian farmers on Canadian land; and thirdly, to collect first-hand data on actual conditions in the Italian colonies to determine whether it is in the best interest of the Italian Government to embark upon the contemplated colonization scheme.

Sentenced to Death For Counter-Revolts

Russian Newspaper Announces Conviction of Fifty-Five Persons

Moscow.—Fifty-five persons have been sentenced to death in South Russia upon conviction of counter-revolutionary activities, the newspaper Pravda announces. The Ukrainian Court at Kiev sentenced 48 members of Petlura's Cossack bands which in connection with General Tutunkov's forces, arose against the Ukrainian Soviet. All the convicted persons appealed.

At Simferopol, Nicolai Bozenko, a young officer who, under an assumed name, proclaimed himself the "Czar of Russia" several months ago, was sentenced to death, together with six followers, while Mme. Bozenko and seven others were sentenced to prison.

German Payroll Shows Increase

Civil Service Employees Get Thirty Per Cent. Raise

Berlin—Germany's civil service payroll for September will show an increase of one hundred million marks over August, in consequence of negotiations between officials and employees at the Ministry of Finance. A 30 per cent. raise in wages was decided upon due to the increased cost of living.

The index figure on the cost of living throughout Germany rose 40.9 per cent. in August as compared with 32 per cent. in July.

Soliciting Funds For Irish Republican Cause

Widow of Major McSwiney in Status to Raise Money

New York.—Mrs. Muriel McSwiney, widow of former Mayor Torrance McSwiney of Cork, who died of starvation in Brixton Prison, London, in 1920, survived on the President Arthur. She was accompanied by Linda Mary Kearns, Irish republican, and said the purpose of her visit was to raise funds for the dependents and orphans of the Irish republican cause and for hospitals of the wounded Irish republican army.

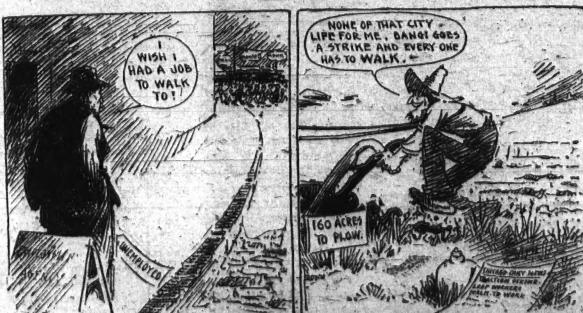

Bennett Balloon Race

Geneva.—Lieut. Ernest de Mayer, of Belgium, officially declared the 1921 race for the Gordon Bennett cup. Captain H. E. Honeywell, an American entrant, was ranked second, and Maurice Blenane, French entry, was ranked third.

British Coal for Boston

Boston.—British coal is pouring into Boston in such quantities that 14 laden vessels are lying in the lower harbor awaiting opportunity to discharge their cargoes, while two others are in the upper harbor. Total tonnage is nearly one-quarter of a million tons have arrived in this port since the first shipment following the American miners' strike. Thirty-six steamers are en route from British ports for Boston, carrying upwards of 200,000 tons.

IT COULD BE WORSE.

Parliament To Consider Extension Of Franchise To Natives Of India

Ottawa—Parliament is to be invited to consider the extension of the Dominion franchise to natives of India resident in Canada.

A few days ago, Right Hon. Sir Frank Sastri interviewed the Prime Minister and members of the Government to urge the enfranchisement of his fellow-countrymen now in Canada. The interview took place in private, but reports have since been current that the Prime Minister had refused the request made by Mr. Sastri. Referred by a Canadian Press representative to these reports, Premier Mackenzie King issued a copy of a letter he had written to Mr. Sastri on the subject.

"Mr. King's letter, which is dated September 5, reads:

"I reply to the representations made by you at the interview with my colleagues and myself on Friday of last week, and which were the subject of further conference between us. I desire to assure you that, at the earliest possible moment, the Government will proceed to introduce the franchise to Indians resident in Canada on the same terms as those which govern the exercise of that right by Canadian citizens generally."

The subject is necessarily one which Parliament alone can determine. It will be submitted to Parliament for consideration when the franchise law is under revision.

"In conveying to the Government of India an expression of the attitude of the Government of Canada in this matter, we hope that you will not fail to make it clear, that, at the present time, in eight of the nine provinces of which our Dominion is composed, the Federal franchise is granted to natives of India resident in Canada on terms which are identical with those applicable generally to Canadian citizens."

Agree to Offer

Loan to Austria

Moratorium of Five Years Asked by London Bankers

London.—A group of London bankers have agreed to offer Austria a loan of between 200,000,000 and 300,000,000 krona according to the Daily Express.

The loan, which would require the approval of the Reparations Commission would be secured by Austria's import revenues, and would be granted only on condition that Austria be given a moratorium of five years on her war indemnity payments.

Big Apple Crop

Ottawa.—The commercial production of apples in Canada, in 1921, was 4,043,013 barrels, with a value of \$24,526,000. The figures were compiled by the Dominion Bureau of Statistics. In the previous year the commercial production of apples was 3,402,410 barrels, valued at \$23,847,749.

Railway Employees May Fight Award In Recent Wage Dispute

Ottawa.—Before the matter could be discussed and decided upon by his Executive Committee, Charles Dicide, Secretary of Division No. 4, Railway

Employees' Union, Montreal, sent a telegram to the Minister of Labour, Minister of Labour, protesting against the Government accepting the majority award of the Board of Conciliation adjudicating the dispute between the 35,000 railway shopmen and the members of the Railway Association of Canada. The telegram pointed out that the award was not a settlement of the trouble, and demanded that the case be reopened.

Toronto.—James Simpson, a member of the Board of Conciliation, whose other two members, Alex Smith, Chadrao, and Isaac Pitblado, K.C., representing the railroads, recommended tentative wage reductions to shop workers of seven and nine cents an hour, believed the 30,000 affected employees will fight the majority award.

Mr. Simpson submitted a minority award which he insisted that the board did not properly inquire into the wage reduction. "On the ground that the principal issue was not dealt with by the board, I feel I can express the opinion that the affected workers will fight the ruling," said Mr. Simpson, although he was not prepared to say the feeling of the men would lead to a strike.

Predicts Revolution In Greece As Result Of Turkish Army Successes

Rome.—A dispatch to the Gazzetta dello Stato from Smyrna has the gates of the city have been closed to exclude the hordes of refugees in flight before the Turkish Nationalist army. British subjects are leaving aboard a British ship, and the families of Greek officials and officers, are departing. French and Italian flags have been hoisted over many houses to indicate that they are under the protection of those countries.

The dispatch adds that reports from Athens predict a revolution in Greece and the return of former Premier Venizelos to power.

The advises say that Mustapha Kemal Pasha is personally directing the advance of the Turks against the Greeks and has shown extraordinary gifts of strategy and military tactics. Considerable feeling was caused here.

The F. M. Thompson Co. will be showing a special range of ladies' Suits, Coats and Dresses at their store on Wednesday and Thursday, September the 20th and 21st. There are no smarter models than these, which are offered at especially low prices. It will pay you to see them and call at our store, where fashion reigns supreme.—F. M. Thompson Co.

It has been proven that Blairmore is a good location for a beauty parlor—so much material for one to practice upon. Our population, you know, is really cosmopolitan, and when beauty parlor manager sees such material as Hindus, etc., walking in, she just leaps for joy at the opportunity. Already the Hindus are getting their moustaches Charlie Chapined, and Mr. Burns don't know who's what at McLaren's Mill.

HILLCREST HAPPENINGS

Mine Rescue Car No. 1 is at present stationed at Hillcrest.

The football match between the married and single ladies resulted in a victory for the bennetts by 2 to 1.

Dan Kyle is making extensive alterations to his residence. His maxim is "in addition, one more room."

Judging by the number of people coming into Hillcrest since work started, the prairie must be quite deserted.

Miss Anna Clark returned to Pincher Creek on Sunday's train, after paying a visit to her mother at Peaceful Valley.

Mr. McVean, the coal inspector, who has been away at different points during the summer, has returned to resume his duties here.

Joe Atkinson is just about finishing his new residence on the hill. When finished, it will be one of the most up to date houses in Hillcrest.

Tom Cowan has accepted a position at the Green Dragon, which will allow Angus more time to fulfil other duties which are occupying a deal of his time just now.

Yorky has returned to town, after spending the summer at W. T. Young's ranch on the South Fork. He is exhibiting a lovely pair of optics, due to falling against a box car.

Quite a number of local fans journeyed to Michel on Sunday to witness the football match between Michel and Coal Creek, at the same time hoping to see Hillcrest enter into the final.

The Boy Scouts First Aid team took in the competitions at Fernie, B.C., on Labor Day, and although not included in the prize winners, they put up a very creditable exhibition, coming ninth in the list, and not seventh as reported.

Get your holiday-films developed and printed by D. A. Howe, Phone 83.

Born on Sunday last, to Mr. and Mrs. Jack Patterson, a daughter.

The second degree will be conferred at the regular meeting of the I. O. O. F. on Tuesday night next.

H. D. MacMillan and Ralph Easterbrook were Cowley representatives at the dance at Greenhill Grill last night.

A most enjoyable balloon and confetti dance was given at the Greenhill Grill last night. In the neighborhood of sixty couples were in attendance.

Don't blame us if the paper is late this week. Blame the lady who told us it was spring time and caused us to give our "hang out" a clean up.

The board of railway commissioners will sit at Lethbridge on Friday of next week. J. E. Gillis will represent the Blairmore Store of Trade and the Town of Blairmore at the sitting.

A man named Matheson sustained fatal injuries near Macleod on Tuesday morning when the car in which he was transporting some forty cases of whiskey turned turtle into a ditch. His comrade escaped practically unharmed.

Mrs. S. H. Kistruck, with her three children, Violet, Lester and Donald Sinclair, stopped off in Blairmore on Wednesday, en route to Opportunity, Washington, where they will in future reside. Mr. Kistruck will join them at Opportunity later.

Since January the first, 1922, a total of 1,087,800 gallons of molasses have been imported into Newfoundland. During the same period over fifty thousand tons of sugar has been consumed. Really, Newfoundlanders are the sweetest people on earth.

We understand that the bid for the property adjoining The Enterprise on the west has been accepted by Mrs. Kistruck. S. Trono is the purchaser.

Mr. Trono purposed moving the present building away and erecting a modern fireproof structure.

It is announced that Mr. Walter Smitten, of Calgary, former secretary of the Alberta Federation of Labor, has been appointed commissioner of labor for the province, the appointment having been made under the terms of the act recently passed for the establishment of a bureau of labor.

The Ontario government recently informed a delegation from the Canadian Electrical Trades Union that a conference would shortly be held to consider proposed legislation for the licensing of electrical workers. It is expected that the proposed license will reduce the number of fatalities and serious accidents among linemen and electrical workers.

A lady reader claims that we are suffering from a severe complication of overexaggeration and underestimation, and that unless we take a course of serious consideration we are liable to end in eternal damnation. We thanked her for her consideration and advised that unless she came through with her subscription of forty-eight hours she would have aroused our consternation.

LAWN SOCIAL NEXT WEDNESDAY

The Lawn Social to be given by the ladies of St. Anne's church will take place on Wednesday next on Mr. Charbonnier's lawn, from 2 to 5 p.m. and from 7 o'clock to midnight. Don't miss it.

A big dance in the pavilion at night.

Mr. A. Manuel returned to Co. on Sunday last.

Never turn up your nose at people. Remember the law of gravity.

Sergt. Scott, of the Blairmore detachment of the A. P. P., paid a visit to Red Deer recently.

We understand that there is no truth in the report that a barbers' union is to be formed at Frank.

The statement is made that prohibition pays its officials. And, sure, nobody doubts that!

Miss Rae of Nova Scotia, has accepted a position on the local public school teaching staff.

The marriage of Mr. W. H. Miley to Miss Anna Muir is shortly to take place at Coleman.

Election campaigners must envy the whale. A ton of oil has been obtained from the tongue of one big mammal.

The Washington Post remarks that the trouble with Ireland seems to be that she is trying to get a union suit over her Ulster.

Firms represented by advertising space in The Enterprise are actually looking for your business and you should patronize them.

A farmer sometimes almost loses his head. We know of several who have made great success of farming, but had forgotten their own cranium and are practically bald.

Miss Gervai, who is to have charge of the local branch of the Lethbridge Conservatory of Music, arrived in town on Friday last. Her pupils are being cared for at the home of Mrs. Ennis.

In the Ladies' Golf Competition on Wednesday, September the 6th, Mrs. Bird won the pin set score 38 for nine holes. After the game, Mrs. Farmer, Mrs. Elwin and Mrs. Pinkney served tea to the players.

The engagement is announced of D. C. Coleman, vice-president of the C. P. R. western lines, to Miss Florence Lynch, daughter of W. J. Lynch, chief of the patents office, Ottawa. The wedding is to take place in October.

At the meeting of the Alberta and British Columbia Poultry Association at Vernon recently, John Mackenzie, of Strathmore, was elected president for the ensuing year and L. D. Nesbit, of Bassano, secretary.

Miss H. M. Bland has accepted a position on the teaching staff at Coleman. She taught at Frank for the past two years or more. Miss Bland spent her summer vacation at Chicago and reached Coleman last week.

H. Ez McFarland, who for several months has been in the wilds of northern Alberta and British Columbia, paid a brief business visit here the early part of the week. Results later left here Monday night on the return trip to the oil and gold fields of the far north.

We know the party holding our rifle is waiting for us to offer a reward, so here goes: Lost, a 22 calibre Winchester Rifle, with initials "W. J. B." cut in end of stock. Party holding same will receive a box of candy on returning same to this office and paying for this notice. Come through, Mike!

A joint circular issued by the Canadian Pacific Railway and the Canadian Pacific Steamships Limited, announces that Mr. Alan Cameron has been appointed Oriental manager, with office at Hong Kong, to take up duties on October the 1st. Mr. Cameron joined the C. P. R. at Winnipeg in 1887. At various times he has held important positions at Vancouver, Victoria, Portland, London, Eng., and New York. As superintendent of the lands branch of the C. P. R., he was very successful and takes up his new and responsible position with the good wishes of all.

The dining room of the Empire hotel at Coleman has been re-opened.
